EXPERIENCE

IDIM - Daejeon, South Korea - Product Design Intern - Feb 2018 ~
IDIM is an award-winning multidisciplinary product design laboratory specialized in social innovation through design. As a part of a team of young designers led by Sangmin Bae, my role here as a product design intern is quick-prototyping, designing and rendering products and making working mock-ups.
Stack: Product Design, Prototyping

myDesignLab - Daejeon, South Korea - Master Student - Mar 2016-Jan 2018 (2 years)
myDesignLab is a design research laboratory which focus in innovating in open design, physical design tools custom design as service and local manufacturing using digital fabrication. As a student under master of science program, I have collaborated with other members of the lab and studied under the supervisor prof. Daniel Saakes.
Stack: HCI Research

Freelance web developer - Daejeon, South Korea - Dec 2015-Nov 2017
For many years, I implemented websites for different clients. I offered consulting regarding design, content, and SEO, and programmed using various technologies and content management systems, especially with javascript framework Angular. http://jundong.info is also a result of my web developing skills.
Stack: Angular2-5, Javascript, Typescript, Http, CSS

Military Service - South Korea - Nov 2010-Nov 2012 (2 years)
